

A new way to purchase.

A Master Lease Agreement for better technology management.

Our Master Lease Agreement outlines terms and conditions between Apple Financial Services and a college or university system. Establishing a Master Lease Agreement is a one-time process and doesn't require an equipment order. Once an agreement is in place, financing Apple products for any department and program within the system is as easy as creating a purchase order.

With financing, departments can use their budgets to put more technology into the hands of more faculty and students more quickly. And it allows you to deploy a single generation of devices, which means lower maintenance costs, fewer compatibility issues, a more manageable plan for upgrades, and more responsible technology disposal.

Apple Financial Services offers several payment options, including one that leads to ownership, another that covers use of the equipment only, and one for custom solutions for specific requirements. And under a Master Lease Agreement, each department in your institution can create a financing plan that fits its needs.

To learn more about how a Master Lease Agreement can improve the way you manage technology in your college or university system, contact your Apple higher education representative at 1-800-800-2775.
